GTA Addon Car Installer

٢٦ آب, ٢٠٢٢ ٠٣:٤٤ ص

Prerequisites:

- The Application
- A brain
- Your dlclist.xml
- Any car

Setting up a car:

1 - Grab the folder with the name of the car, so it will be a folder with a dlc.rpf in.
2 - Put that folder in your car folder

Steps:

1 - Grab your dlclist.xml and place it in the root folder (same as the application)
2 - Open the dlclist.xml
3 - Save the dlclist.xml and open the application
4 - Go to Installer tab
5 - Change the mods Location folder to your GTA mods folder
6 - Change the cars location folder to where you downloaded your cars
7 - Press Start and watch the magic happen.

8 - The application will notify you when it's done, once it is finished, drag your dlclist.xml back into OpenIV and load GTA!
